

Pregnant?

Thinking about getting pregnant?

Prenatal Genetic Screening
It's *your* choice

Prenatal genetic screening is available for all pregnant women in BC. This screening can tell you the chance of your baby having Down syndrome, trisomy 18 or an open neural tube defect.

The earlier you see your health care provider, the more options you will have.

Prenatal screening is your choice. For more information, talk to your health care provider and visit our website at www.bcprenatalscreening.ca
